

RZNC-05 Series

Control Handle

Emergent Recover

Tel: +86-010-82923063/82920792

Fax: +86-010-82923063-811

[Http://www.sharpskync.com.cn](http://www.sharpskync.com.cn)

Remark: please must sure read this before you want to recover the DSP.(if not, the DSP would not be repaired by yourself and must send to manufacturers).

1. Power off the DSP(handle)
2. Press the "ok" key then power on with the computer.(please connect with the computer)
3. Leave your finger(the "ok" key) when the DSP(handle) screen is light on
4. If you had right to do , the DSP screen will show you this:

5. Please select the "Emegenty program" and press "ok" key

Remark: you can press the "X-" to move the cursor.

6. Press the "ok" key the DSP will formatting , like this

7. The DSP will show you this after format

8. Please select the "Normal Version".

9. Please press the "ok" key

Remark : This picture was show my product information , they are differents with different types of our products.

10. If all of over is like my said , please power off and power on. The DSP will good work.

Good luck!
